CARLYN LEE

EXPERIENCE

Jet Propulsion Laboratory, California Institute of Technology August 2012 - Present
Applications Software Engineer *Pasadena, CA*

- Parallelized Deep Space optical link channel coding simulations for ranges 0.25 AU - 1AU on Cray XC40, which enabled signal and noise trade-space exploration in bit error rate regime of 10e-8. Developed az-el terrain mask algorithm on Cray XC40 to analyze Lunar Orbiter Laser Altimeter data in high fidelity communications link coverage mapping. Developed and integrated link performance & SNR calculation and data volume modeling tools in python for concurrent link analyses in Mars 2020 Relay Telecom Predictor.
- Communications support for collaborative multi-agent autonomy in maritime and subterranean environments. V&V for software on networked Raspberry Pi's and unmanned surface vehicles. Radio mesh network trade studies in mining tunnel contributed to 1st place in DARPA's Urban Circuit Subterranean Challenge. Ultra-wide band ROS integration to improve robot localization in GPS/comm deprived environments.
- Developed intelligent interfaces for DSN operators and telecom engineers to support to NASA deep-space missions. Implemented Link Complexity and Maintenance endpoint from events & trends based on Sequence of Events files and modeled link complexity profile. Architected data delivery systems for DSN downlink streams to reduce rover operator response-time to requirement of 20 minutes. Using Tableau WDC & Kibana, aggregated data and event anomalies flagged by rules-engine and spacecraft housekeeping data.
- Telecom forecast prediction tools for various deep space missions, including full web stack development for SaaS application prototype. Implementation of network link models. Spacecraft, planetary, camera-matrix, and events analysis using C/C++. UX development for scheduling telecom links, e.g. Liferay portlet, Drupal, D3, WebGL.
- Modeling of communications traffic flow for human exploration of Mars & Moon. Python implementation of Markov model for estimating bandwidth requirements in Deep Space Network simulations.
- Radio science operator for Cassini Spacecraft. Investigation of atmospheric losses for 32GHz radio communications recorded on Deep Space Network open & closed loop receivers. Prototyped data warehouse for quick visualization of radio science data from Cassini Spacecraft during 2004-2015.

Spectral Imaging Laboratory November 2011 - Present
Consultant *Pasadena, CA*

- Post-processing algorithm to correct for manufacturing inconsistencies in prototype of artificial compound eye.
- Application of super resolution algorithms to ray-traced simulations of images captured with artificial compound eyes. Using Matlab and openCV, improved resolution of images degraded with noise models.
- Modeling of visual acuity for multiple apertures on curved surface. Implementation of neural networks to improve angular resolution of a point light source.

California State University, Fullerton December 2009 - August 2012
Research Assistant & Intern *Fullerton, CA*

- Designed and implemented framework to improve run-time efficiency & accuracy of cancer detection using eigen decomposition of DNA microarray data with large feature set.
- Implemented framework to explore next generation sequencing alignment techniques for discovering binding sites in heat-shock proteins, integration of C/C++ self-organizing maps.
- Developed scheduling tool for library resources using .NET framework. C# student web application, VB.NET admin configuration tool. Database design & implementation using SQL Server & stored procedures.

EXTRACURRICULAR, VOLUNTEER & PROFESSIONAL AFFILIATIONS

Interplanetary Small Satellite Conference Committee; Caltech Alpine Club Website Administrator; Private Pilot-ASEL +300hrs including instruction in PA28, C152, C172, CT210M; Technician Class Amateur Radio Operator
2019 Member of Duarte Ad Hoc Finance Advisory Committee, appointed by Duarte City Council
2010 - 2012 Vice-President of Association for Computing Machinery, CSU Fullerton.

AWARDS & HONORS

2015 3rd place Topcoder Open Finals API Hackathon.
2013 1st place Biotech Track, 15th Annual IEEE Biomedical Engineering Biotech Contest.
2012 Anita Borg Scholarship, CSUPERB Travel Grant, Orange County Outstanding Engineering Student Award.

EDUCATION

California State University, Fullerton

M.S. Computer Science — *August 2012*

B.S. Computer Science, Minor in Mathematics — *July 2011*
