CARLYN LEE

EXPERIENCE

Jet Propulsion Laboratory, California Institute of Technology   August 2012 - Present
Applications Software Engineer   *Pasadena, CA*

- Parallel channel coding simulations and high-res az-el terrain mask algorithm development on Cray XC40. Integration and development of Link Performance & SNR calculation and Data Volume modeling tools for concurrent link analyses in M2020 Relay Telecom Predictor.
- Communications support for collaborative multi-agent autonomy in maritime and subterranean environments. V&V for software on networked Raspberry Pi's and unmanned surface vehicles. Trade studies and implementation of radio mesh network in mining tunnel contributed to 1st place win in DARPA's Subterranean Challenge Urban Circuit. Ultra-wide band ROS integration to improve robot localization in GPS/comm deprived environments.
- Developed intelligent interfaces for DSN operators and telecom engineers to increase efficiency of operator support to NASA deep-space missions. Implemented framework for Link Complexity and Maintenance software to query events & trends from Sequence of Events files and estimate a link complexity profile. Architected data delivery systems for DSN downlink streams to reduce rover operation response-time to requirement of 20 minutes. Using Tableau & Web Data Connectors, Kibana aggregated data and event anomalies flagged by rules-engine and Event Verification Records & Engineering Housekeeping, and Accountability data.
- Telecom forecast prediction tools for various deep space missions, including full web stack development for SaaS application prototype. Implementation of network link models. Spacecraft, planetary, camera-matrix, and events analysis using C/C++. UX development for scheduling telecom links, e.g. Liferay portlet, Drupal, D3, WebGL.
- Modeling of communications traffic flow for human exploration of Mars & Moon. Python implementation of Markov model for estimating bandwidth requirements in Deep Space Network simulations.
- Radio science operator for Cassini Spacecraft. Investigation of atmospheric losses for 32GHz radio communications recorded on Deep Space Network open & closed loop receivers. Prototyped data warehouse for quick visualization of radio science data from Cassini Spacecraft during 2004-2015.

Spectral Imaging Laboratory   November 2011 - Present
Consultant   *Pasadena, CA*

- Post-processing algorithm to correct for manufacturing inconsistencies in prototype of artificial compound eye.
- Application of super resolution algorithms to ray-traced simulations of images captured with artificial compound eyes. Using Matlab and openCV, improved resolution of images degraded with noise models.
- Modeling of visual acuity for multiple apertures on curved surface. Implementation of neural networks to improve angular resolution of a point light source.

California State University, Fullerton   December 2009 - August 2012
Research Assistant & Intern   *Fullerton, CA*

- Designed and implemented framework to improve run-time efficiency & accuracy of cancer detection using eigen decomposition of DNA microarray data with large feature set.
- Implemented framework to explore next generation sequencing alignment techniques for discovering binding sites in heat-shock proteins, integration of C/C++ self-organizing maps.
- Delivered scheduling tool for library resources using .NET framework. C# student web application, VB.NET admin configuration tool. Database design & implementation using SQL Server & stored procedures.

EXTRACURRICULAR, VOLUNTEER & PROFESSIONAL AFFILIATIONS

Interplanetary Small Satellite Conference Committee; Caltech Alpine Club Website Administrator.
2019 Member of Duarte Ad Hoc Finance Advisory Committee, appointed by Duarte City Council.
2010 - 2012 Vice-President of Association for Computing Machinery, CSU Fullerton.

CERTIFICATIONS

Adult and Pediatric First Aid/CPR/AED, The American Red Cross (Certificate ID 00ISKSO).
Technician Class Amateur Radio Operator.
Private Pilot-ASEL +300hrs including instruction in PA28, C152, C172, CT210M.

EDUCATION

California State University, Fullerton

M.S. Computer Science *August 2012*

B.S. Computer Science, Minor in Mathematics *July 2011*
